PROFESSIONAL SUMMARY

Computer Science undergraduate at **Chaitanya Bharathi Institute of Technology (CBIT)** with a **CGPA of 8.71**. Skilled in **Artificial Intelligence, Machine Learning, Generative AI, Full-Stack Development**, and **Data Structures & Algorithms (DSA)**, with experience in **Python, LangChain, RAG, Vector Databases**, and the **MERN**.

EDUCATION

Chaitanya Bharathi Institute of Technology (CBIT)

Bachelor of Engineering (B.E.) in Computer Science and Engineering

2023 – Present

CGPA: 8.71/10.0

SKILLS

Programming: Python

Machine Learning: Supervised Learning, Unsupervised Learning, Ensemble Learning, NLP, Recommendation Systems

Generative AI: Retrieval-Augmented Generation (RAG), Vector Embeddings, Prompt Engineering, AI Agents

Frameworks & Libraries: LangChain, NumPy, Pandas, Scikit-learn, Matplotlib

Vector Databases: ChromaDB, FAISS

Web Development: MERN Stack, Next.js, Streamlit, FastAPI

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, Thunder Client, VS Code, DVC

MLOps & Deployment: CI/CD Pipelines, Data Versioning, Code Versioning, MLflow

Coursework: Data Structures & Algorithms, System Design, Compiler Design

PROJECTS

Medical Chatbot – Generative AI Powered Healthcare Assistant

🐙 GitHub

- Developed an AI-powered healthcare assistant using **LangChain**, **Retrieval-Augmented Generation (RAG)**, and **LLMs** to provide accurate, context-aware medical responses.
- Implemented **Vector Embeddings** and **Pinecone Vector Database** for efficient semantic search and knowledge retrieval from medical documents.
- Built and deployed a **Streamlit** application featuring real-time conversational AI, scalable document ingestion, and enhanced response accuracy through retrieval-based generation.

ML Pipeline – End-to-End ML Workflow using DVC

🐙 GitHub

- Designed and implemented an end-to-end **Machine Learning Pipeline** for data preprocessing, model training, evaluation, and prediction.
- Leveraged **DVC (Data Version Control)** for pipeline automation, experiment tracking, reproducibility, and dataset version management.
- Integrated **Git**, **DVC Pipelines**, and modular code architecture to enable scalable workflows and efficient collaboration across development stages.

ATS Scorer – AI-Enhanced Resume Analyzer Platform

🐙 GitHub

- Developed a full-stack **MERN** application to analyze resumes based on **ATS compatibility**, keyword matching, section completeness, readability, and formatting.
- Integrated an **AI Agent** to generate personalized resume feedback, actionable improvement suggestions, and intelligent career insights.
- Implemented resume parsing, score generation, and report tracking features to help users optimize resumes for recruitment and applicant tracking systems.

ACHIEVEMENTS

- 97.78 percentile in JEE Mains (AIR 25000)
- Solved 650+ problems on LeetCode

CERTIFICATIONS

- Supervised Machine Learning – Andrew Ng (Stanford, DeepLearning.AI)
- HackerRank Python (5) and SQL Certification
- Oracle AI Foundations Associate

EXPERIENCE

Hackathons

- Built end-to-end prototypes in 24-hour hackathons using modern technologies.
- Collaborated in teams to design and present functional solutions.

EXTRACURRICULAR ACTIVITIES

- Participated in coding competitions, cultural events, and sports activities.
